

Hands-On 4 Project: HO4_Template_Driven_Form

Commands:

```
ng new HO4_Template_Driven_Form --routing --style=css
cd HO4_Template_Driven_Form
ng g c pages/enrollment-form
ng serve
```

What we did:

Created template-driven enrollment form using FormsModule, ngModel, validation, submit and reset.

enrollment-form.ts

```
import { Component } from '@angular/core';
import { FormsModule, NgForm } from '@angular/forms';
import { CommonModule } from '@angular/common';
```

```
@Component({
  selector: 'app-enrollment-form',
  standalone: true,
  imports: [FormsModule, CommonModule],
  templateUrl: './enrollment-form.html',
  styleUrls: ['./enrollment-form.css']
})
export class EnrollmentForm {
  submitted = false;
```

```
  student = {
    studentName: "",
    studentEmail: "",
    courseId: "",
    preferredSemester: "",
    agreeToTerms: false
  };
};
```

```
  onSubmit(form: NgForm) {
    console.log(form.value);
    if (form.valid) {
      this.submitted = true;
    }
  }
}
```

enrollment-form.html

```
<h2>Enrollment Request Form</h2>
```

```
<form #enrollForm="ngForm" (ngSubmit)="onSubmit(enrollForm)">
```

```

<label>Student Name:</label>
<input name="studentName" [(ngModel)]="student.studentName" required minlength="3"
#nameCtrl="ngModel">

<p *ngIf="nameCtrl.touched && nameCtrl.errors?.['required']">Name is required</p>
<p *ngIf="nameCtrl.touched && nameCtrl.errors?.['minlength']">Minimum 3 characters
required</p>

<label>Email:</label>
<input name="studentEmail" [(ngModel)]="student.studentEmail" required email
#emailCtrl="ngModel">

<p *ngIf="emailCtrl.touched && emailCtrl.errors?.['email']">Enter valid email</p>

<label>Course ID:</label>
<input name="courseId" [(ngModel)]="student.courseId" required>

<label>Preferred Semester:</label>
<select name="preferredSemester" [(ngModel)]="student.preferredSemester" required>
  <option value="">Select</option>
  <option value="Odd">Odd</option>
  <option value="Even">Even</option>
</select>

<label>
  <input type="checkbox" name="agreeToTerms" [(ngModel)]="student.agreeToTerms" required>
  I agree to terms
</label>

<button type="submit" [disabled]="enrollForm.invalid">Submit</button>
<button type="button" (click)="enrollForm.resetForm()">Reset</button>
</form>

<div *ngIf="submitted">Enrollment request submitted successfully!</div>

```

Output screenshot: Form submitted successfully message.
