

Hands-On 6 Project: HO6_Services_DI

Commands:

```
ng new HO6_Services_DI --routing --style=css
cd HO6_Services_DI
ng g s services/course
mkdir src\app\models
type nul > src\app\models\course.model.ts
ng g c pages/course-list
ng serve
```

What we did:

Created CourseService, used dependency injection, shared course data from service.

course.model.ts

```
export interface Course {
  id: number;
  name: string;
  code: string;
  credits: number;
  gradeStatus: 'passed' | 'failed' | 'pending';
}
```

course.service.ts

```
import { Injectable } from '@angular/core';
import { Course } from '../models/course.model';

@Injectable({
  providedIn: 'root'
})
export class CourseService {
  private courses: Course[] = [
    { id: 1, name: 'Angular', code: 'ANG101', credits: 4, gradeStatus: 'passed' },
    { id: 2, name: 'React', code: 'REA101', credits: 3, gradeStatus: 'pending' },
    { id: 3, name: 'NodeJS', code: 'NOD101', credits: 4, gradeStatus: 'passed' }
  ];

  getCourses(): Course[] {
    return this.courses;
  }

  getCourseById(id: number): Course | undefined {
    return this.courses.find(c => c.id === id);
  }

  addCourse(course: Course): void {
    this.courses.push(course);
  }
}
```

```
}  
}
```

course-list.ts

```
import { Component, OnInit } from '@angular/core';  
import { CommonModule } from '@angular/common';  
import { CourseService } from '../services/course.service';  
import { Course } from '../models/course.model';
```

```
@Component({  
  selector: 'app-course-list',  
  standalone: true,  
  imports: [CommonModule],  
  templateUrl: './course-list.html',  
  styleUrls: ['./course-list.css']  
})  
export class CourseList implements OnInit {  
  courses: Course[] = [];  
  
  constructor(private courseService: CourseService) {}  
  
  ngOnInit() {  
    this.courses = this.courseService.getCourses();  
  }  
}
```

course-list.html

```
<h2>Courses from Service</h2>  
  
<div *ngFor="let c of courses">  
  <h3>{{ c.name }}</h3>  
  <p>{{ c.code }}</p>  
  <p>{{ c.credits }}</p>  
</div>
```

Output screenshot: Course list loaded from service.
